## Hilbert-Burch matrices for ideals in $K[x, y]$

Aldo Conca

Universitat de Genova

Let  $I$  be an ideal  $I$  of  $k[x, y]$  such that  $\dim K[x, y]/I = 0$ . We show that there is a canonical choice for the Hilbert-Burch matrix of  $I$ . As an application, we determine the dimension of certain affine Gröbner cells and their Betti strata recovering results of Ellingsrud and Strømme, Götsche and Iarrobino. This is a joint work with G. Valla.
