## COMISSIÓ DE BIOÈTICA

### Deadlines for presenting amendments to the UB Bioethics Commission

1. Once the investigator receives the amendments relating to his/her project, he/she will have a **period of one month** to submit the documentation with the requested modifications (as laid down in point 8.4 of the [CBUB Organization and Functioning Regulation](#)).
2. If no response to the comments is received after this month, the CBUB Technical Office will send a **reminder to confirm** that the investigator is working on the amendments.
3. A **second reminder** will be sent a month after the first reminder:
  - 3.1. If the investigator does not confirm that they are working on the amendments within a **maximum of two weeks**, the project will be **rejected**.
  - 3.2. If the investigator confirms that they are working on the amendments, they will have **one additional month** to send the required documentation. After this month, if the documentation has not been received, the project will be **rejected**.
4. If the project is rejected, the evaluation procedure should be started again.
