AA	Riera i Prunera, Maria Carme	mcriera-prunera@ub.edu	2	Econometric analysis and forecasting of trade, FDI, migration, employability and tourism	Students who would like to carry out the dissertation following this line of research will develop an empirical analysis of topics related to applied economics from an international perspective, such as trade flows determinants, firm location decisions, FDI impacts, migration drivers, determinants of employability and analysis of tourism flows. The dissertation should have a clear relationship with these fields, but students are encouraged to suggest alternative topics that are appropriate to their specific interests and expertise, although an intensive use of statistics and econometric techniques learnt in the degree will be required in any case. The dissertation should contain a description about what we currently know about the selected topic, add a theoretical discussion suited for the specific problems analyzed and discuss this in light of the obtained empirical evidence.	Anglès
AB	Andre Romero, Maria Encarnacion	andre@ub.edu	2	Statistical techniques in the business environment	The objective of the work is the application, by the student, of statistical techniques to real situations in the business and economic world to facilitate decision-making, making use of real databases.	Anglès
CA	Martins Brotherhood, Luiz Mario	martinsbrotherhood@ub.edu	4	Topics in international macroeconomics	Effects of international shocks (market competition, tariffs, etc.) on the macroeconomy and on local markets (local labor markets, local product markets, etc.). Cross-country empirical analysis. Macroeconomic models with international shocks. I also advise macroeconomic topics not related to international economics.	Anglès
LA	Serra Galindo, Carla	carla.serra@ub.edu	4	Development of a business idea in a global context	In this topic the student will be aimed to analyze a business opportunity in a globalized context. The technical, economic and financial viability of this idea will be analyzed and the necessary procedures and strategies will be developed to transform it into a business project.	Anglès
LB	Garcia Herrero, Ana Belen	anagarciah@ub.edu	8	Internationalization plan	The internationalization plan as a tool for a company that wants to start an internationalization process or wants to consolidate and/or expand its activities in different international markets. The internationalization plan proposes a roadmap that serves as a guide for the company to establish objectives, markets, products and actions to start/follow during the internationalization process.	Anglès
MA	Marti Gonzalez, Francisco Javier	xmarti@ub.edu	4	Global Economy and International Relations.	The line of research is broad in order to cover different topics. Thus, within the framework, we could analyse the changes experienced in the global economy as a consequence of the emergence of the so-called emerging economies, which have been consolidating the emergence and/or expansion of the so-called BRICS. The growth process that these emerging economies have undergone over the last few decades often involves a process of uneven development within the same country, associated with socio-economic inequality. At the same time, the slowdown that these economies have suffered in recent years is related with the sustainability of the development model itself, making evident the structural weaknesses of this strategy. The student could also analyse the role played by different International Organizations, or alternatively, one could also analyse the evolution and/or transformation in the functioning and/or objectives of other International Organizations as a consequence of recent changes in the world economy.	Anglès

MB	Tadei, Federico	federico.tadei@ub.edu	2	Economic Growth in Historical Perspective.	You will have the opportunity to approach contemporary issues and topics from a long-term perspective. For example, students will be able to develop aspects related to the causes of inequality between some countries, the history and consequences of economic crises in historical perspective, the evolution of inequality in the long term or the impact of different economic policies in specific historical contexts, among many other topics. It can also analyse aspects related to the international economy, linking economic dynamics with institutional, technological or other changes.	Anglès
NA	Marmol Jimenez, Maria Teresa	mmarmol@ub.edu	2	Financial Products Analysis	In this topic the student will be aimed to analyze financial products (such as savings deposits, pensions schemes, loans, fixed-income securities, etc.) that can be present in both national and international financial markets. The study of these financial products may provide guidance for investment and financing decisions made by particulars and firms	Anglès
NB	Gonzalez-Vila Puchades, Laura	lgonzalezv@ub.edu	2	Financial Products Analysis	In this topic the student will be aimed to analyze financial products (such as savings deposits, pensions schemes, loans, fixed-income securities, etc.) that can be present in both national and international financial markets. The study of these financial products may provide guidance for investment and financing decisions made by particulars and firms	Anglès
X1	Busqueda responsabilidad del estudiante			Ad-hoc	L'estudiant pot escollir lliurement una temàtica que no s'hagi proposat en la llista general i un tutor específic. En aquest cas, ha de presentar un projecte de TFG ad hoc (on ha de constar el títol, els objectius i el pla de treball) signat per l'estudiant, pel professor tutor que es proposa i per la direcció del departament al qual pertany aquest docent, a més de remetre'l al coordinador de TFG a continuació.	Català, Castellà, Anglès
