Winter Microsimulation Workshop

"Dynamic microsimulation and the role of intergenerational transfers"

February 1, 2023

Department of Economics and Statistics, University of Torino, Lungo Dora Siena 100/A, Torino, Italy

In presence: Language Lab #4 (to be confirmed) – Register **here** if you plan to attend in presence
Online: https://unito.webex.com/unito/j.php?MTID=m1c05aca43a96dcdf1a79e54dcfb80671

09.15 Elisabetta Ottoz (Univesity of Torino), Lia Pacelli (LABORatorio Revelli), Matteo Richiardi (University of Essex): Introduction

09.30 Concepcion Patxot (University of Barcelona)
Intergenerational transfers in the NTA/NTTA framework

10.15 Martin Spielauer (WIFO).
MicroWELT - A modular, continuous-time, interacting population microsimulation platform for the comparative analysis of private and public welfare transfers over the life course and between generations.

***11.00** Coffee break*

11.30 Matteo Richiardi & Justin van de Ven (University of Essex)
LABSim: an open-source framework for life-course analysis

12.15 Michele Bavaro & Stefano Boscolo (Italian Treasury and University of Cassino)
Simulating Long Run Wealth Distribution and Transmission: the role of inter-generational transfers in Italy.

***13.00** Lunch*

14.15 Marialuisa Maitino, Letizia Ravagli (IRPET)
The intergenerational redistribution of the pension system in the dynamic microsimulation model IrpetDin

15.00 Francesco Figari (University of Eastern Piedmont)
EUROMODspatial Italy: a new model to evaluate the fiscal and distributional impact of public policies at local level

15.45 Open discussion

16.00 Matteo Richiardi (University of Essex): Conclusions
